●

Delivery on-time declining

ELEVATED

On-time rate fell to 91%, below the 92% target for two cycles. A failover Routine is proposed.

●

Margins softening

ELEVATED

Gross margin down 1% as volume shifts to lower-tier plans. Pricing test recommended.

●

Ops depends on one carrier

HIGH

Single-carrier dependency in Delivery concentrates risk. Diversification queued.

●

Forecast: seasonal demand spike

WATCH

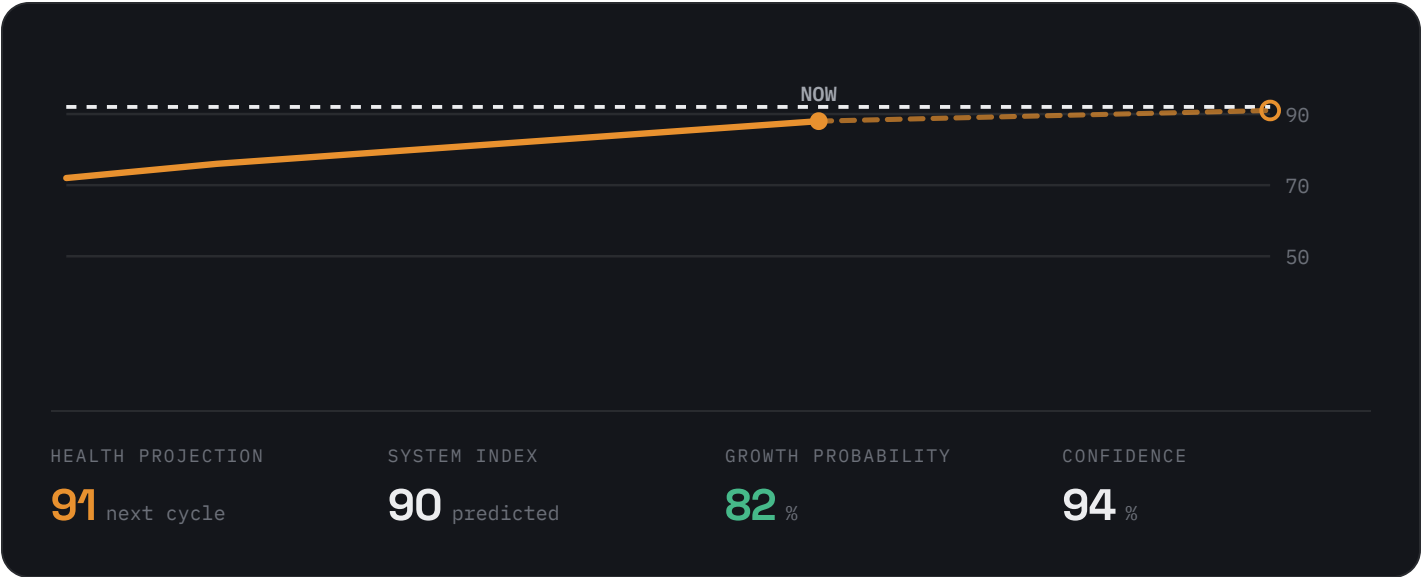

Inbound volume projected +22% next month. Capacity Routine should activate before week 3.
