

ASSEMBLE OPERATIONAL WORKFLOWS

Orchestration Builder

Compose a complete operational workflow from Routines, branching logic, and AI-decision nodes — then test, monitor, and publish it with one-click rollback. Every node traces to the same operating system.

§05

VERSIONING · ROLLBACK · PUBLISHING

v3	draft · validated, passing	CURRENT
v2	published 6 days ago	STABLE
v1	published 21 days ago	STABLE

Publishing v3 replaces v2 with zero downtime. One-click rollback restores v2 instantly, with no data loss. Draft is validated and passing — ready to publish.
