

PRODUCT SPECIFICATION

Business Intelligence Scan

Three connected surfaces — a public lead-generating scan, an internal agency intelligence workspace, and a committed-client full diagnosis with continuous monitoring — built on the canonical Auxion operating model.

SURFACES	SCREENS	ROLES	SCAN STAGES
3	15	5	9

DELIVERY PHASING

- MVP · ships first
- LATER · phase two
- REQUIRES AI ENGINE
- REQUIRES EXTERNAL DATA PROVIDER

Public Scan

Generate qualified leads without giving away the full intelligence engine. Limited scans, preview results, and a locked full report.

S01 · INTAKE · MVP

URL & qualifying intake

Flow: website URL → business details → scan progress → limited diagnosis → lead capture → unlock full report.

WEBSITE URL northwindretail.com	BUSINESS NAME Northwind Retail	INDUSTRY Retail · E-commerce
COUNTRY / LOCATION Jamaica	PRIMARY GOAL Grow revenue	EMAIL · PHONE (OPT) ops@northwindretail.com

Limitations: 3 free scans/day · no complete competitor report · no full operating blueprint · no downloadable proposal · no sensitive operational recommendations.

Nine real progress stages

Progress reflects meaningful stages, never a timer. Sources that can't be read are marked *unavailable*, not estimated. Checkpointed and resumable.

#	STAGE	WHAT IT DOES
1	Discovering the business	Resolving domain, identity, and category
2	Crawling public pages	Reading home, product, pricing, contact
3	Identifying competitors	Matching category peers by overlap
4	Collecting evidence	Capturing observable signals + timestamps
5	Benchmarking	Scoring against category medians
6	Diagnosing domains	Assessing the seven operating domains
7	Generating Insights	Compiling evidence-backed findings
8	Building recommendations	Sequencing Moves by impact + effort
9	Preparing report	Assembling the limited preview

3 KEY PROBLEMS

- **Slow first response** — 38% of leads wait >24h for first contact.
- **Weak mobile experience** — mobile score 52/100 on mobile-first traffic.
- **No unified analytics** — decisions run without shared numbers.

3 OPPORTUNITIES

- **One-hour lead routing** — proven in category.
- **Review generation** — 4.1★ vs 4.6★ leader, closable gap.
- **Checkout recovery** — high cart abandonment, low-effort win.

RECOMMENDED NEXT ACTION

Route new leads to first contact within one hour.

Why: slow first response is the single largest observed drag on conversion. **Gain:** est. +18–26% qualified-lead conversion within 60 days.

LOCKED IN THE FULL REPORT

- Complete 8-competitor benchmarking
- Full operating blueprint & System Map
- Downloadable proposal (PDF)
- Sensitive operational recommendations

Lead capture: email preview + request consultation / unlock full report.

Internal Intelligence

Agency-only workspace for scanning prospects and generating branded proposals.
Private to authorized internal roles.

Spanish Town Legal stlegal.jm	Professional	49	Diagnosed	K. Chen

§05 · NEW PROSPECT SCAN · MVP

Operator inputs: prospect website, business name, industry, location, contact, known pain points, estimated budget, notes. Full engine — deeper crawl, complete competitor set, proposal generation (~3 min). Nothing is shared with the prospect until sent.

Riverside Clinic — baseline Index 38 → target 88

A capable clinic held back by manual intake and slow digital response. Seven domains, five gaps, confidence high.

DOMAIN	FINDING	EVIDENCE	BASIS	PRIORITY
WEB · Digital	Booking is call-only in business hours; mobile 52/100.	Crawl · Lighthouse	OBS	HIGH
SAL · Sales	No lead capture form reachable in under 3 clicks.	Crawl · UX path	OBS	HIGH
CRM	Patient records appear paper/spreadsheet-based.	Inferred intake	INF	MED
OPS · Operations	No confirmation/reminder step — no-shows unmanaged.	Booking flow	OBS	HIGH
DEL · Delivery	Wait-time and capacity not published or measurable.	Source unavailable	N/A	LOW
ANL · Analytics	No analytics tag detected; decisions run blind.	Tag scan	OBS	HIGH
AI Layer	Est. ~14 manual staff-hours/week automatable.	Modelled	EST	MED

● OBSERVED · direct evidence ● ESTIMATE · modelled ● INFERRED · pattern ● N/A · source unavailable

Up to 10 competitors · defensible metrics only

Each cell carries an evidence basis. We never imply certainty a source can't support; unavailable data reads as such.

COMPETITOR	WEB	SEO	CONTENT	REVIEWS	CONV	TRUST	SOCIAL	RESP
Riverside (this)	52	Low	Thin	3.9★	Poor	Good	Low	—
Bayview Medical	84	High	Active	4.7★	Strong	Strong	High	<1h
Harmony Health	77	Med	Active	4.5★	Good	Strong	Med	<4h
Coastline Care	71	Med	Steady	4.4★	Good	Good	Med	—
Unity Clinic	68	Med	Thin	4.2★	Fair	Good	Low	<8h
Northgate Practice	66	Low	Thin	4.0★	Fair	Good	Low	<8h

Two competitors declined to expose response-time data (unavailable); local social presence is inferred from public handles, not verified analytics.

NOT MET

Unlocks: complete diagnosis · full 10-competitor benchmarking · System Map & baseline Index · domain findings + evidence · recommended Moves & automation · continuous monitoring + rescan.

Operating — and climbing • Index 38 → 64

Since activation the Index moved from a baseline of 38 to 64. Booking and lead-response gaps closed; reputation rising. 5 of 7 System Map nodes live.

DOMAIN	FINDING	BASIS	STATE
WEB • Digital	Online booking live; mobile improved to 79/100.	OBS	FIXED
SAL • Sales	Lead routing responds within 40 min median.	OBS	FIXED
CRM	Records consolidating; migration 60% complete.	OBS	IN PROG
OPS	Reminders live; no-shows down 34% so far.	OBS	FIXED
DEL • Delivery	Capacity view now measurable; tuning ongoing.	OBS	IN PROG
ANL • Analytics	Unified dashboard live; weekly review adopted.	OBS	FIXED
AI Layer	2 Auxiliaries active; est. 9 hrs/wk reclaimed.	EST	LIVE

INSIGHTS

- No-show reminders drive the biggest single gain (34% reduction in six weeks).
- Mobile fixes lifted booking completion 41% → 63%.
- Review velocity closing the gap: 3.9★ → 4.3★.

RECOMMENDED MOVES

- Add SMS reminder 2h before appointment (High)
- Launch local SEO program (Measured)
- Test online deposit for new patients (Exploratory)

Progress since Scan #3 • Apr 2026

SYSTEM INDEX 64 ▲9 was 55	NO-SHOW RATE 11% ▼6pt was 17%	AVG RESPONSE 40m ▼22m was 1h 2m	RATING 4.3★ ▲0.2 was 4.1★
--	--	--	--

Index trajectory across scans: 38 → 47 → 55 → 64 (target 88). Changes detected are marked observed vs inferred; rescan on demand. Includes downloadable report and historical comparison.

System & Access

Graceful failure states, mobile adaptations for the public flow, and the five-role entitlement model.

§13 · ERROR & RECOVERY · MVP

STATE	BEHAVIOR	SYSTEM RESPONSE
Timeout	Site too slow to finish; completed stages saved.	6/9 · checkpoint saved
Unsupported	Behind login / blocks crawlers — no guessed score.	0/9 · unreachable
Partial	Some sources unavailable; findings marked N/A, not estimated.	7/9 · 2 findings N/A
Rate limit	3 free public scans used; register to continue.	0 remaining · resets 00:00

Resume: progress is checkpointed after each stage. A dropped connection resumes from the last completed stage — no work lost, no partial finding discarded. Cancellation supported at any stage.

§14 · MOBILE ADAPTATIONS · MVP

The lead-generating public flow is mobile-first: same tokens, single column, 44px minimum targets, and locked sections that stack instead of blur. Three steps — URL & details intake, scan progress, limited results & unlock.
