§03 THE MOVE 

DECISION BRIEF · MV-118

AWAITING REVIEW

## Add a failover carrier Routine to Step 5 · Carrier Assignment.

### WHY

The primary carrier hit capacity three times this week. Each event delayed roughly 40 orders and pulled on-time delivery from 96% to 91% — below the 92% target.

### EVIDENCE

|                           |             |
|---------------------------|-------------|
| Carrier capacity breaches | 3 this week |
| Orders analysed           | 1,240       |
| Fault located             | Step 5 only |

### WHAT CHANGES

**NOW** Single carrier. On capacity failure, a person manually reassigns each order.

**AFTER** When capacity passes 90%, orders fail over to the approved secondary carrier automatically.

### PROJECTED IMPACT

|                  |                        |
|------------------|------------------------|
| On-time delivery | 91% → ~96%             |
| System Index     | 87 → 89                |
| Cost per order   | No change · within SLA |

### SCOPE & GUARDRAILS

- Applies to Step 5 only; no other step is touched.
- Caps at the secondary carrier's SLA; no pricing changes.
- Uses existing data only; nothing new is shared.

### REVERSIBILITY

One-click undo, any time. Reverts to current behaviour instantly, with no data loss. Ships as a 14-day trial you can end early.

### AUDIT

Proposed 11:04 by Delivery-02  
Simulated on 1,240 orders  
Awaiting your approval

### SIMULATED

Replayed against the last 1,240 orders: on-time recovers to **96.2%**, 3 of 3 capacity breaches auto-handled, zero cost increase. No changes applied yet.

## §04 AUDIT TRAIL EVERY CHANGE, LOGGED

|       |   |                                                                  |           |
|-------|---|------------------------------------------------------------------|-----------|
| 11:04 | ● | Delivery-02 isolated a Fault in Step 5 and prepared Move MV-118. | AUXILIARY |
| 11:04 | ● | MV-118 simulated against 1,240 historical orders.                | AUXILIARY |
| 09:22 | ● | Primary carrier reached capacity — 41 orders delayed.            | SYSTEM    |
| 08:15 | ● | On-time delivery Signal crossed below the 92% target.            | SIGNAL    |
